

INTRODUCTION TO DATABASE AND SQL (SPRING 2022)

Instructor	Brendan Shea, Ph.D.	Course number	COMP 1140
Contact Info	Brendan.Shea@rctc.edu 507-722-1146	Prerequisites	MATH 0099: Intermediate Algebra
Office	M2403Q	Class location	Online
Zoom Office Hours	Thursday and Friday 12 to 2:30 at class Zoom link.	Class time	Optional Synchronous Section: Wed 1 PM to 3 PM at class Zoom link
Class Zoom Link	https://minnstate.zoom.us/j/99874991922 Passcode: 312566		

Welcome to COMP 1140: Introduction to Database and SQL! I'm your instructor, Brendan Shea (I prefer "Brendan"; "Dr. Shea" or "Prof. Shea" work if you are feeling formal). This is the syllabus for the course. If you have short questions that are NOT answered here, email is generally the best way to get ahold of me. For more detailed questions about the class, I'd encourage you to talk to me during office hours (either in person or over the phone), or to set up an appointment.

For this class, you'll have the opportunity each week to attend **synchronously** via Zoom on Wednesday afternoons OR **asynchronously**. The asynchronous option will require that you do additional writing or activities. You can feel free to attend synchronously some weeks, and asynchronously other weeks, as best fits your schedule.

Course Description: This course introduces the major concepts of database design and implementation. Students will learn how to design, build and use databases utilizing a conventional DBMS system such as Microsoft SQL Server, MySQL, Oracle, and etc. Topics also include entering and retrieving information, SQL commands, query creation, analyze query results, and etc. Students will design their own databases and implement them on a conventional DBMS system. College level reading is required. (3 cr, 3 hours lecture per week)

COURSE CONTENT AND LEARNING OUTCOMES

Outline of Major Content Areas:

1. Database design and implementation
2. Information entering and retrieving
3. SQL commands
4. Queries
5. Analysis of query results
2. Design databases and implement them on a conventional DBMS system.
3. Enter and retrieve information from databases
4. Use SQL commands to create queries.
5. Analyze query results.

Learning Outcomes (General):

- The student will be able to:
1. Demonstrate an understanding of Database Management Systems (DBMS) and how they can be used in industry.

RCTC Core Outcomes. This course contributes to meeting the following RCTC Core Learning Outcome(s):

- **Critical Thinking.** Students will think systematically and explore information thoroughly before accepting or formulating a position or conclusion.

REQUIRED COURSE MATERIALS

- The only course material is **Cengage Unlimited**. This will give you access to ALL of Cengage's materials (including multiple books and SQL activities). In terms of course readings, the main textbook is:
 - Coronel, Carlos, and Steven Morris. *Database Systems: Design, Implementation, & Management*. 13th edition. Australia ; United States: Cengage Learning, 2018.
 - If you'd like a physical copy of this book, you can rent one (cheaply!) with your Cengage unlimited subscription. Older editions are also available online for fairly cheap, but the quizzes/activities will require the newest version.
 - The main reason for adopting Cengage Unlimited is that it will give you access to **MindTap**, which will provide a platform for various course activities (such as coding SQL).
- This course will require that you have reliable, regular internet access (to complete online quizzes, etc.).

GRADING AND COURSE POLICIES

Grading Scale: >=90.0 (A), 80.0-89.9 (B), 70.0 -79.9 (C), 60.0-69.9 (D), <60 (F).

Your final grade is a weighted average of the following:

- **Wednesday Labs: Two choices! (20%).** Most weeks, you'll have the opportunity to work on labs either **synchronously** (on Wednesday afternoon) or **asynchronously**. If you attend synchronously, you'll have the opportunity work on these labs in teams of 2-4 (and I'll even give you feedback!). If you attend asynchronously, you'll need to submit these by Wednesday night.
 - If you can, I encourage you to attend labs on Wednesday 😊.
- **D2L Quizzes (10%).** Most weeks on SUNDAY, there will be an "objective" D2L quiz. You'll get TWO chances to do each D2L quiz.
- **MindTap "Critical Thinking" Activities (10%).** These will also be due on SUNDAY. You will have UNLIMITED tries to get the MindTap activities correct.
- **Three take-home exams (20% each; 60% total).** These will generally be a mix of short-answer, graphical, and coding questions. You'll have THREE days to complete each exam.
- **Extra Credit (up to +3%).** There may be occasional opportunities for extra credit, which I will let you know about. For reasons of fairness, I can't offer extra credit opportunities to individual students, so please don't ask.

Plagiarism and Academic Integrity. Your work should be your own—please don't use your classmates, friends, parents, internet sites, etc. to help you write your papers or answer test questions. And when you do use outside sources (such as for bits of computer code), make sure to give appropriate citation and acknowledgment for any words, ideas, code snippets, etc. If the preponderance of the evidence suggests cheating has occurred (that is, if the evidence suggests that this is *more likely than not*), you will receive a failing grade on the assignment. A second violation will lead to failing grade for the course. Please also see the RCTC statement on academic integrity later in the syllabus.

Attendance. Students in face-to-face classes are expected to attend class regularly, while online students are expected to participate in the class discussions and activities. If you miss more than two weeks consecutively, or 1/3 of the total class sessions, you may receive a failing grade of FW. This may endanger your ability to receive financial aid. With this in mind, it is *your* responsibility to withdraw from the class if you decide not to continue. I am willing to make exceptions if circumstances require, but you need to let me know about these in a timely manner.

POLICY ON LATE WORK: PLEASE READ BEFORE EMAILING ME!

Please read the following *before* e-mailing me to request an extension on an assignment. Here are my policies for making up missed or late work:

- Over the course of the semester, you can make up to TWO missed quizzes or activities without penalty. Just send me an email and I will open them up for you. These must be completed within a week of the original due date.
- Exams 1 and 2 can be submitted late. If they are submitted with 48 hours, your grade will be capped at 90%, and if they are submitted with 1 week your grade will be capped at 80%. Extensions past this point will require meeting with me (and may result in additional penalties). Exam 3 cannot be submitted late, absent exceptional circumstances.
- I will make exceptions to these policies if you can demonstrate a genuine need. Please come talk to me if anything comes up that is preventing you from succeeding in class.

ALL late work should be submitted to the D2L "Late Work" assignment folder. NO LATE WORK WILL BE ACCEPTED DURING THE LAST WEEK OF CLASS (again, absent exceptional circumstances).

EXPECTATION FOR "LIVE" ZOOM SESSIONS

For this class, you'll have the opportunity to attend class synchronously (and can earn credit for the "activities" portion of your grade by doing so). If you choose to attend these live sessions, my expectations are as follows:

1. Please make sure to attend from a quiet location, and "mute" your mic if you aren't speaking.
2. Please come on time (the same as you would for a face-to-face class).
3. I'd prefer that your cameras be on, *especially* during small group work. I understand that there are times this won't work! However, when working with classmates, it really does work better if people can see your face. (I also appreciate this as an instructor 😊).
4. If you are "absent" during small group work (and don't interact with your peers), you won't receive credit for the activity.
5. You'll occasionally be asked to submit short, in-class coding, diagramming, or writing assignments. For this reason, you should be at a computer (as opposed to a phone or tablet) when attending class. As with the group work, if you don't submit these, you won't receive credit for the activity.

RCTC COMMON POLICIES

This course will be taught in accordance with the following policies, which apply to ALL RCTC courses. If you have any questions about these, please let me know!

Academic Integrity Statement. The primary academic mission of Rochester Community and Technical College (RCTC) is to provide quality learning opportunities for students. Acts of academic dishonesty undermine the educational process and the learning experience for the student and our college community. It is the responsibility of the student to complete their academic requirements with integrity and not engage in acts of cheating, plagiarism, or collusion. The College expects that students are submitting work and materials that reflects their individual learning and efforts within their course, program, and college academic requirements. It is expected that RCTC students will understand and adhere to the concept of academic integrity and to the standards of conduct outlined within this policy. Students who are found to have engaged in an act of academic dishonesty may face academic sanctions through the Academic Integrity Procedure and non-academic misconduct sanctions through the Code of Student Conduct.

Americans with Disabilities Act. Rochester Community and Technical College is committed to ensuring its programs, services and activities are accessible to individuals with disabilities, through its compliance with state and federal laws, and System Policy. Appropriate accommodations are provided to those qualified students with disabilities. If you believe you qualify for an academic accommodation, please contact the Director of Disability Support Services, Travis Kromminga at 507-280-2968 or through the Minnesota relay TTY 1-800-627-3529. The office can also be reached via e-mail at travis.kromminga@rctc.edu.

Military Friendly Statement. Rochester Community and Technical College (RCTC) is a military friendly campus, pledging to do all we can to help military veterans transition into college to complete their educational goals. RCTC is proud to be a Beyond the Yellow Ribbon campus, serving and honoring our veterans, military service members and their families. Through the Veterans Resource Center, RCTC offers student veterans an on-campus point of contact with other veterans, and program information to assist them in making a successful transition into college. For assistance, students are encouraged to contact the Veterans Assistant Coordinator, Mark Larsen, at 507-779-

9375 or e-mail at mark.larsen@state.mn.us, or Othelmo da Silva, RCTC's VA certifying official at 507-285-7566 or email at VeteranServices@rctc.edu.

Title IX Statement. Sexual violence and other forms of sexual misconduct is prohibited at Minnesota State colleges and universities (Minnesota State). Any individual who has been, or is being, subjected to conduct prohibited by the Sexual Violence Policy is encouraged to report the incident. Individuals may choose to file a complaint anonymously using the online reporting tool (<https://www.rctc.edu/services/student-affairs/sexual-violence/>). Individuals who choose to file anonymous reports are advised that it may be difficult for the college to follow up or take specific action, where information is limited. For additional information please see the RCTC Sexual Violence Policy, <http://www.rctc.edu/policies/system/sexual-violence> or contact Rebecca Peine, Title IX Coordinator, at 507-285- 7195 or email at TitleIX@rctc.edu.

GETTING IN TOUCH WITH ME (AND WHAT TO INCLUDE IN AN EMAIL)

The best way to get ahold of me is by e-mail, which I will aim to respond to within ONE working day (for simple questions) or TWO working days (for more complex ones). I don't generally check email on the weekends or holidays. If you don't hear from me by then, please try emailing me again. In order to help me provide you with quick, effective feedback, here's a general template for what I expect in an email.

Dear Brendan (or Professor Shea):

My name is [full name], and I'm a student in [this section] of [this class]. I had a question regarding [identify quiz, textbook chapter, etc. Be specific, and include a copy of anything I might need to answer your question, including the full problem text, if applicable]. Here's everything I've tried so far to figure out the answer for myself [looked at the syllabus, notes, textbook, etc.], and here's my best guess as to the answer. Could you help me by doing the following? [Be specific in what you are asking me to do.] [Feel free to include anything else you'd like here. I'm always happy when students send along ideas/links/whatever vaguely relating to ethics and philosophy 😊]

As I rule, I will not respond to requests that you be exempted from class policies without very good reason (e.g., for late-work extensions outside the conditions outlined above), or to emails that lack basic identifying information (your full name, class, etc.). For long or complex questions, I highly encourage you to schedule an appointment so that we can talk (either in person or by phone). Oh, and please don't call me Mr. Shea (That's my dad!).

RESOURCES FOR STUDENT SUCCESS

Some helpful resources at RCTC (all of which are included with your course tuition) include the following:

- **Student Support Services/TRIO (SS 159)** provides academic support for first-generation and low-income college students, as well as those with documented disabilities.
- **Drop-in Tutoring (AT 306)** is available free of charge to *all* RCTC students. Please take advantage of it!
- **Online Tutoring** is available at www.tutor.com, accessible via D2L (so, don't go directly to the website—instead, log on to the main RCTC D2L page, and look for the link). This online tutoring option also includes a form where you can submit a paper for review (there is something like a 12-hour turn around).

COURSE CALENDAR

Unless otherwise noted, the readings are from *Database Systems: Design, Implementation, & Management. 13th edition*. I will let you know ahead of time if there are any changes. Most of the readings can be found in your textbook; I will make the others available to you online.

QUIZZES on each chapter will generally be due on the Friday of that week.

Week	Week Starting	Reading	Topics Covered
1	1/9	Syllabus	Class Introduction, "Learning How to Learn"
2	1/16	Ch. 1	Intro to Databases
3	1/23	Ch. 2	Data Models
4	1/30	Ch. 3	The Relational Model
5	2/6	Ch. 4	The Entity-Relationship Model
6	2/13	Exam 1	
7	2/20	Ch. 5	More Data Modeling
8	2/27	Ch. 6	Data Normalization
9	3/6	SPRING BREAK	
10	3/13	Ch. 7 (part 1)	Basic SQL, part 1

11	3/20	Ch. 7 (part 2)	Basic SQL, part 2
12	3/27	Exam 2	
13	4/3	Ch. 8 (part 1)	Advanced SQL, part 1
14	4/10	Ch. 8 (part 2)	Advanced SQL, part 2
15	4/17	Ch. 9	Database Design
16	4/24	Ch. 15	Databases and the Web
17	5/1	Exam 3	
18	5/8	Choose your own adventure! (extra credit)	Topics to be announced
